Steiner On Vaccines - TDW

October 7, 1917
"The time will come – and it may not be far off – when quite different tendencies will come up at a
congress like the one held in 1912 and people will say: It is pathological for people to even think in terms of spirit and soul.

'Sound' people will speak of nothing but the body. It will be considered a sign of illness for
anyone to arrive at the idea of any such thing as a spirit or a soul. People who think like that will be considered to be sick and – you can be quite sure of it – a medicine will be found for this. . . .

The soul will be made non-existent with the aid of a drug. Taking a 'sound point of view,' people will invent a vaccine to influence the organism as early as possible, preferably as soon as it is born, so that this human body never even gets the idea that there is a soul and spirit.

Rudolf Steiner

Did Steiner predict the future? Did he speak of the child on the autism spectrum, without soul or spirit?

Was the vaccine he spoke of the Hepatitis B shot, given on day one of after delivery? What about vaccines while baby is in utero like the flu shot and TDaP? Would they impact the soul and spirit of the child?

What about pharmaceuticals? Did Steiner foresee this….
